The U.S. Government's conduct in this matter of the Cuban Government's just demands proves that the formation of the committee at the instigation of the U.S. State Department was simply a maneuver to discredit the Cuban revolution. Nevertheless, the world has been fully informed of the Cuban Government's firm and clear stand.

Cuba Will Not Surrender

Havana Radio Centro in Spanish 1950 GMT 3 July 1961--B

(See Roca article in HOY: Invasion, Tractors, and Prisoners)

(Summary) The U.S. Government, acting outside of all principles of international law, morals, and its own national laws, recruited men whom it organized and armed to carry out a bloody and criminal invasion. The invasion against Cuba was repulsed by the Cubans. Certain of its strength, power, its position of right, the revolution offered to return the prisoners captured if the United States paid indemnification for the material damage caused to our country in that infamous invasion, but the U.S. Government acted differently. Under the pressure of circumstances it endorsed the idea, but under millionaire pressure it began to haggle like the lowest of merchants.

CPYRGHT

That is what imperialism is made of. It is inhuman, ferocious, bold to organize murders and destruction, but incapable of defending those who, because of its culpability, are now prisoners and criminals. The only law is aggression and violence. First it invades us; then it deprives us of butter and sends agents to place bombs. It will attempt other economic and military aggressions, but Cuba is prepared for all. Cubans are invincible. Cuba will not surrender and will not kowtow.

With the unity of its people and the solidarity of Latin America, the Socialist countries, and the world, and inspired by the不可动摇的 slogan of Fatherland or death, we Cubans are sure that we will win.
